FAMILY OWNED AMERICAN TOOL COMPANY SINCE 1872

Dear Seymour Midwest Partners,

If you're looking for a commodity tool company, we're sorry you've come to the wrong place. However, if you're looking for a **Partner** who has never stopped engineering and manufacturing long handled and **task specific tools**, well, you've come to the right place.

Our **commitment to excellence** has not wavered since 1872 when the Company we're proud to lead today was founded. In an era of endless value engineering, product rationalization & increasingly anonymous companies, we're delighted to lead **a team of passionate employees that are dedicated to being toolmakers.**

At Seymour Midwest we start every day with two very simple goals, both of which start with you our Customers and Partners:

- **Delight the Customer**
- **Outperform the Competition**

We trust you'll find that our **Partner Resource Guide** meets both of our goals and ultimately makes it **easier for you to buy, your customers to sell, and the end-user to select the right product.**

There is a lot of energy across the Seymour Midwest business as we look toward the future. We're excited about our prospective outlook and look forward to our continued partnership.

In the meantime, we look forward to seeing you at upcoming tradeshow and partner events. Don't hesitate to reach out if there is anything we can do to help you grow your business.

Your partnership and loyalty to Seymour Midwest and our family of brands is appreciated and valued!

SEYMOUR MIDWEST LEADERSHIP TEAM

Matthew Teevan - *Chief Operating Officer*

Randy Huss - *Chief Financial Officer*

Jeff LaMontagne - *Senior Vice President of Operations*

Jason Henthorn - *Vice President Information Systems*

LIMITED WARRANTY

At Seymour Midwest we're proud to continue our 148 year heritage by designing, manufacturing and selling tools offering outstanding performance year-after-year. We stand behind our products by extending to the **original purchaser a warranty that our products will be free from manufacturing defects in materials and workmanship during normal use**, subject to the qualifications listed below.

The typical life of a tool is determined by the conditions and level of use. Frequent, daily use will wear out a tool faster than infrequent, occasional use. **Defects in materials or workmanship typically arise early in the life of a tool.** Our **Limited Warranty** does not cover normal wear, lost parts, damage inflicted intentionally by the user, or failures due to accident, misuse, abuse, negligence, alteration or modification.

At Seymour Midwest's discretion, Seymour Midwest will replace or issue credit for any tool or accessory that our examination determines to be within this warranty. **Tools or accessories which are abused or worn out from normal use are excluded from this warranty.**

The length of warranty per tool series is listed in the chart below subject to the above criteria.

SERIES	WARRANTY
Structron® S800 SuperDuty™	Limited Lifetime
Structron® S700 SpringFlex™	
Structron® S600 Power™	
Structron® S600 Safety™	
Seymour® S550 Forged™	
Seymour® S500 Industrial™	
Midwest Rake® S550 Professional™	
Kenyon® S550 Irrigation™	
Seymour® S400 Jobsite™ / S400 Safety™	Limited 15 Year
Seymour® S300 DuraLite™ / Toolite® S550 Mud & Muck™	Limited 5 Year
Seymour® S200™ / Link Handles®	Limited 1 Year
All Striking Tools	Limited 1 Year

**Certain exclusions apply to all series levels.*

How to Make a Warranty Claim: For all warranty claims, simply return the tool along with your dated **proof of purchase** to the place of purchase to initiate the replacement process. Please have the following information available when making a warranty claim: brand, item number, date and proof of purchase and explanation of how the tool broke.

Repair or replacement is the sole remedy available to the end-user or reseller.

Seymour Midwest expressly denies any liability for damage, injury or expense arising directly or indirectly as a result of the manufacture, sale, delivery, resale, repair, use or misuse of the products.

**For the most up-to-date warranty information, please visit SeymourMidwest.com.*

SEYMOUR MIDWEST BRAND HIERARCHY

SUPERIOR HEAVY-DUTY TOOLS
STRUCTRON®

Our brand hierarchy is intended to provide a **quick and easy visual reference** for where each of our products fit in our hierarchy while also providing **visual continuity at the point-of-purchase**.

STRUCTRON® & SEYMOUR® BLADE LABELS

The above blade labels illustrate **THE DIFFERENCE IS REAL™!** attributes for Structron® and Seymour®, our two primary long handled tool brands. Additionally, the blade labels summarize the Fiberglass, Safety and Hardwood options available by series.

COATINGS

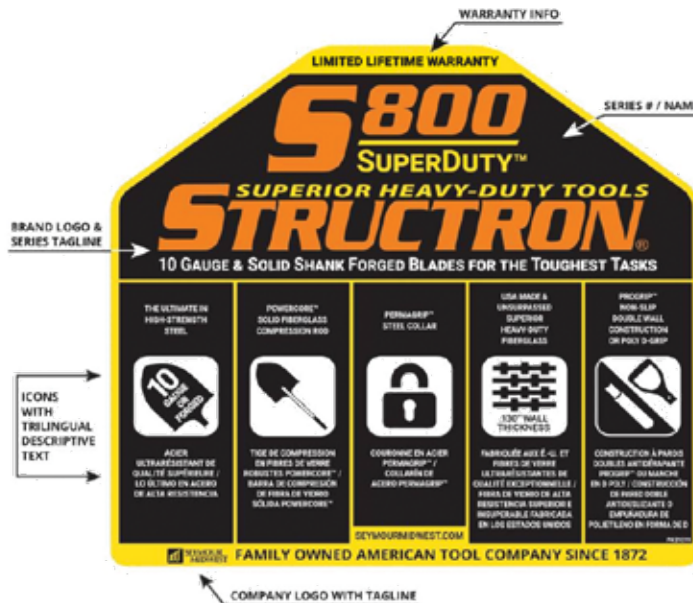

THE DIFFERENCE IS REAL™!

THE DIFFERENCE IS REAL™! There's a reason we don't look like other companies in our category – we still offer more tools for more specialty applications and markets.

Numerical Hierarchy: The brand hierarchy chart on page 5 is your “decoder ring” for the brands that call Seymour Midwest home. Our numerical hierarchy features a **Good / Better / Best / Premium** line-up. There's nothing one-size-fits-all about our tools, and making sure there is clear product differentiation as you move up and down the hierarchy means **easier more informed selling and purchasing**.

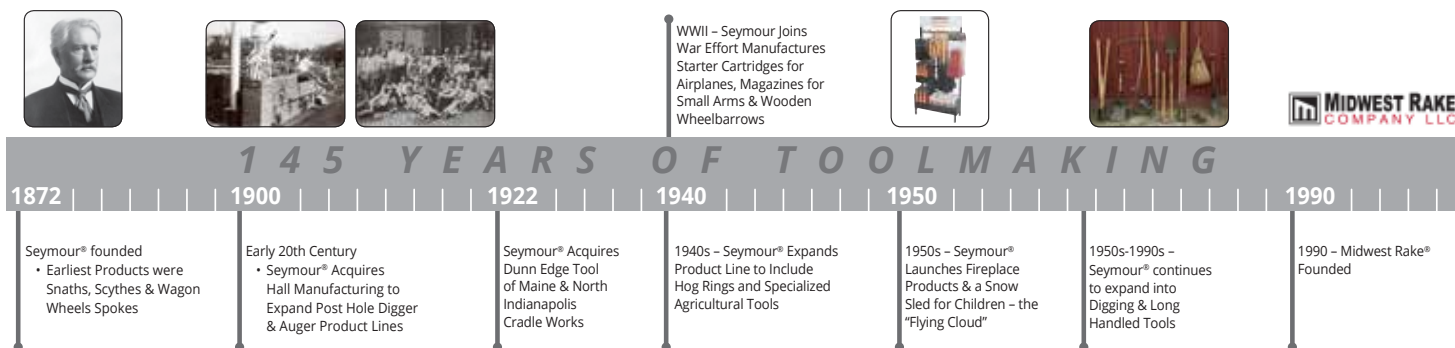

Organization:

- **Tools are organized by type to allow for ease of navigating the document:**
 - All Round Points are combined into four pages so you can easily survey all available options. The same goes for Square Point Shovels / Scoops / Rakes and the rest of our product line.
- **Tools are organized within their tool type by numerical hierarchy, we always start at the Premium (Structron®) level and work to our Good (\$200) product offering.**
 - S800 SuperDuty™ > S700 SpringFlex™ > S600 Power > S600 Safety™ > 550 Forged™ > S500 Industrial™...
- **We've continued with a grid format for easy-to-digest product attribute information.**

Toolmakers not Commodity Distributors: Ever notice why some tools feel stronger than others? Chances are it starts with our contoured precision lathe-turned Ash and Hickory handles. **Since our founding in 1872 we've been Toolmakers.** That's a legacy and heritage that we strive to live up to everyday. We're not a manufacturer of a commodity and as such, we're willing to 'sign-up' to some very specific information when it comes to the tools we sell.

Toolmakers & Specifics: That's the second part of our **Partner Resource Guide** – the **specifics** of the tools we offer. The 'grids' on each page are full of the details that help all who use this document better understand what they're

looking at. At the point-of-purchase, we've also invested in product labeling that we are confident will:

- **Provide a harmonious product appearance regardless of the series offered at the point-of-purchase.**
- Provide specific information, not generalities that will enable a more informed purchase. We're firm believers that a confused shopper or buyer isn't going to go for the more expensive item if there is nothing there to explain the difference.

Look for the blade labels on the tools throughout the document. Again, we're toolmakers so we're happy to sign-up to the specifics.

Seymour Spans the Globe: We're proud to sell our product around the world and have updated all tools that feature artwork with **trilingual English, Spanish & French** descriptions to best meet the needs of the market segments and global customers we serve.

It's All About the Brands: We're proud of our timeline over the past 148 years and of the brands that call Seymour Midwest home. While we have multiple brands, when they're displayed in a store or planogram it's imperative that **all brands look like they belong to the same family.**

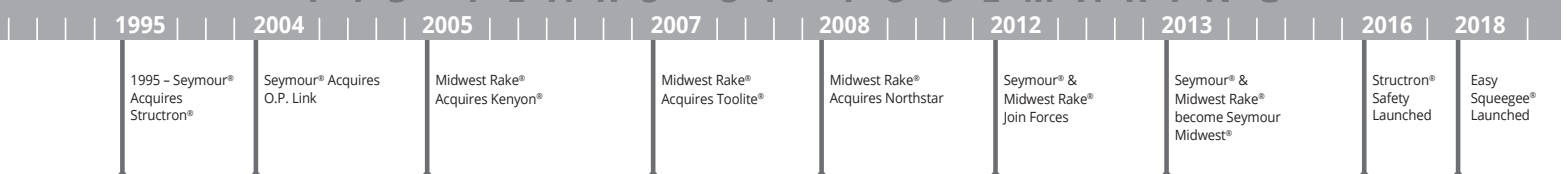

All the Tools for Any Task on a Single Purchase Order!

Partners in Profit is a clever saying but with Seymour Midwest we provide a unique opportunity to expand our business together. **Coatings tools from Midwest Rake® are best in class and an excellent incremental opportunity. FireStarter, aquatic tools, Toolite® Mud & Muck™ shovels, Structron® S700 SpringFlex™, Sports Turf maintenance, the list goes on and on.** Need some help – let us know and we'll gladly assist.

Merchandising: Updated branding – make sure you have our latest artwork for your promotions & merchandising! Contact your Seymour Midwest Account Manager to learn more and ensure your content is up-to-date and meets proof of performance standards.

145 YEARS OF TOOLMAKING

THE DIFFERENCE IS REAL!™

BEST-IN-CLASS CONTRACTOR TOOLS

Since 1979 the Structron® brand has led the industry. Nearly indestructible, Structron® tools are always there when you need them the most.

ASSEMBLED IN THE USA
 with American hands in Indiana.

PROGRIP™ COMFORT GRIP

Made of durable textured vinyl with a non-slip surface for a secure grip with excellent shock-absorbing protection. Unique double-wall construction for greater durability. Weather resistant.

POWERCORE™ SOLID FIBERGLASS COMPRESSION ROD

Extends 13 inches from the handle into the shank and blade for maximum strength at this critical stress point.

HIGHEST QUALITY BLADES

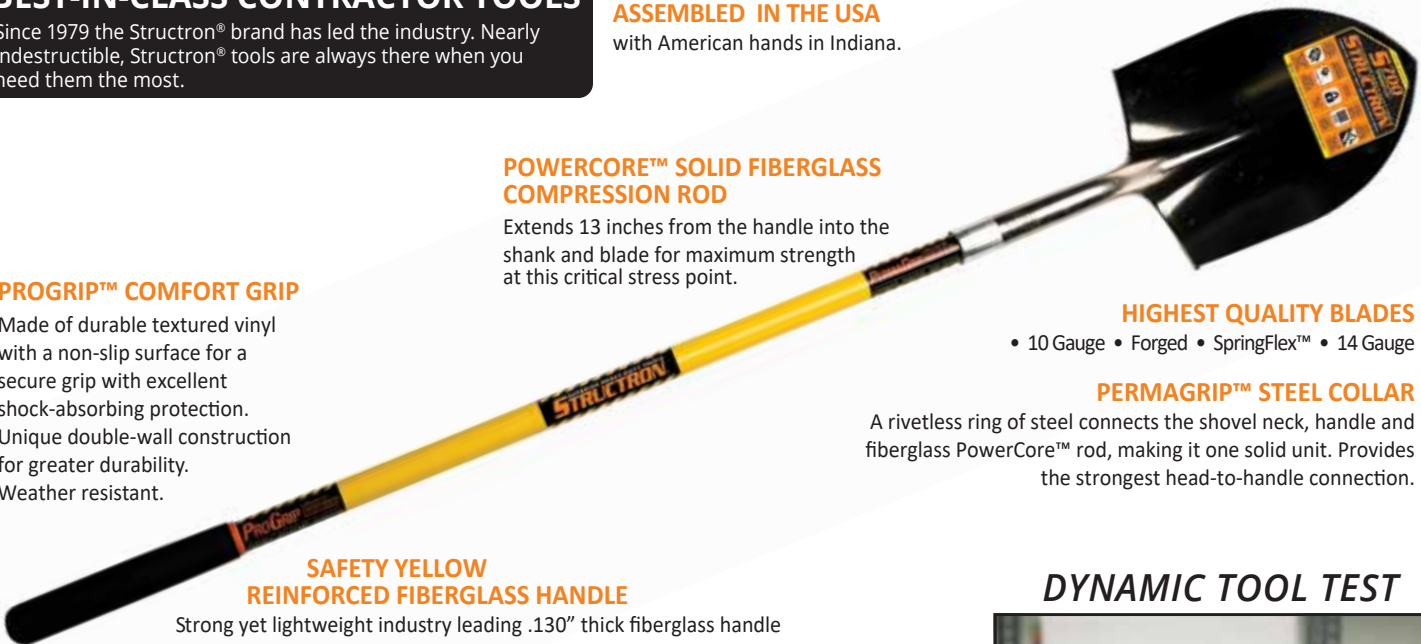

• 10 Gauge • Forged • SpringFlex™ • 14 Gauge

PERMAGRIP™ STEEL COLLAR

A rivetless ring of steel connects the shovel neck, handle and fiberglass PowerCore™ rod, making it one solid unit. Provides the strongest head-to-handle connection.

SAFETY YELLOW REINFORCED FIBERGLASS HANDLE

Strong yet lightweight industry leading .130" thick fiberglass handle provides maximum durability and visual impact and the strongest fiberglass.

DYNAMIC TOOL TEST

TOTAL TOOL STRENGTH

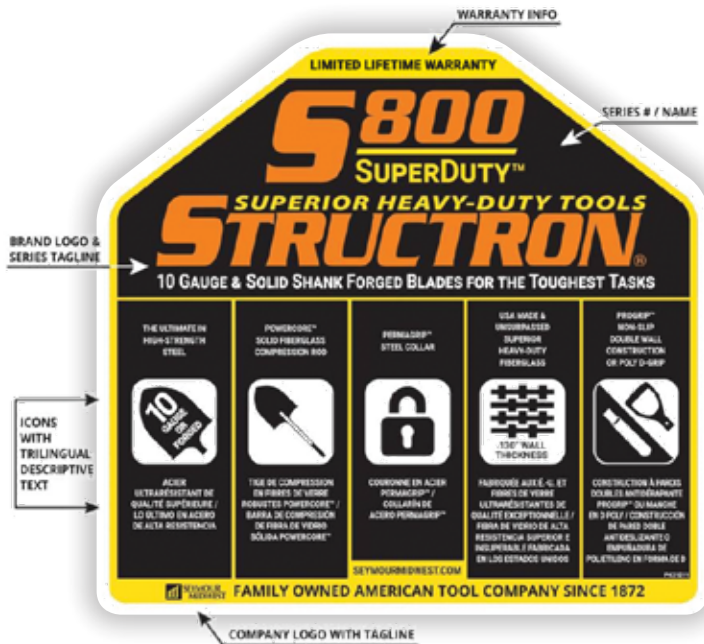

SHOVEL WITH FIBERGLASS HANDLE	WEIGHT	HANDLE LENGTH	CONNECTION SYSTEM	HANDLE/HEAD INSERT	DYNAMIC TOOL TEST POUNDS TO FAILURE
49730 / 5700	4.9 POUNDS	48"	CRIMPED FERRULE NO RIVET	FIBERGLASS POWERCORE™	250 POUNDS

COMPETITOR 3	4.5 POUNDS	47.5"	PRESS COLLAR	METAL TUBE	201 POUNDS

UNSURPASSED, UNDISPUTED, UNRIVALED...
 IN A WORD, UNDENIABLE.

Meet the tools that have no equal: Structron®

Structron® is unlike any tool you've ever used or sold. Experience the power and **profitability** that comes with selling the Structron® family of tools. You might even agree, it's unfair to the competition.

STRUCTRON® LABELS THAT IMPROVE COMMUNICATION OF SPECIFIC PRODUCT & SERIES ATTRIBUTES

THE DIFFERENCE IS REAL™!

STRUCTRON® - PREMIUM

SUPERIOR HEAVY-DUTY TOOLS STRUCTRON® S800 SUPERDUTY™

10 GAUGE & SOLID SHANK FORGED BLADES FOR THE TOUGHEST TASKS

We won't take it personally if you never buy forged shovels again. In fact, when your customers experience our one of a kind 10 Gauge shovels, we're confident they'll forget about forged as well.

Stronger, lighter and nearly unbreakable? The Structron® 10 Gauge **Caprock and Impact shovels** are game changers for tasks that have historically called for a forged tool.

Also up to the task and featuring premium Structron® fiberglass and our PowerCore™ for unrivaled strength the rest of the S800 SuperDuty™ line-up all feature the original forged blades.

SUPERIOR HEAVY-DUTY TOOLS STRUCTRON® S700 SPRINGFLEX™

SPRING STEEL FLEXES BUT WON'T BREAK - THE ULTIMATE SHOVEL

Some tools are just plain superior and the S700 SpringFlex™ are those tools.

When tasked with creating **the ultimate shovel** our engineers specified **SpringFlex™**. Manufactured to our **exacting standards** and exhibiting the attributes of spring steel, paired with the strength of the hallmark Structron® Solid Fiberglass Compression Rod, these eleven shovels bury everything else out there. Backed by a limited lifetime warranty, these tools are the textbook definition of "investment grade."

SPRINGFLEX™

SUPERIOR HEAVY-DUTY TOOLS **STRUCTRON® S600 POWER**

SUPERIOR STRENGTH FOUNDED ON EXCELLENCE IN DESIGN, ENGINEERING & MANUFACTURING

Looking to Differentiate? Guaranteed to Outperform!

Don't ever confuse Structron® with other products in the market. The same goes for the S600 Power™ series. 14 Gauge blades are out there, but the competition does not offer a **Solid Fiberglass Compression Rod** – what we call the **PowerCore™**.

PermaGrip™ – A rivetless ring of steel connects the shovel neck, handle and fiberglass insert, making it one solid unit. Provides the strongest head-to-handle connection.

SUPERIOR HEAVY-DUTY TOOLS **STRUCTRON® S600 SAFETY**

BE SEEN, BE SAFE – HIGHEST VISIBILITY SUPERIOR STRENGTH TOOLS

Our Structron® Safety™ line is an excellent addition to any construction crew looking to **increase worker visibility and safety during daylight and nighttime hours**. Like high visibility safety clothing, Structron® Safety™ tools are safety green and utilize (2) 3M® Series 3300 tape accents made of **highly retroreflective microprismatic markings**, designed to enhance visibility and detection and exceed the reflectivity values of ASTM Type III.

SEYMOUR® S550 FORGED

SOLID SHANK FORGED BLADES

If the “classic” tool exists, it’s a forged blade with a hardwood handle – that’s S550 Forged™.

Tools in this category include:

- Shovels
- Drain Spades
- Bow Rakes
- Specialty Tools (such as Eye Hoes and SuperScrapers™)

SEYMOUR® S500 INDUSTRIAL™

HEAVY-DUTY INDUSTRIAL GRADE TOOLS

Two words describe the S500 series: **Industrial & Specialized**.

Industrial means these tools will be in the **Industrial Supply houses** along with the other 14 Gauge blades.

Specialized can be found in the sheer volume of items we offer that can’t be found elsewhere in the market. Take scoops for example: multiple handle lengths & heavy aluminum blades mean you’re selling the absolute best when you carry S500 scoops. The same goes for other **task specific tools**: Steel Augers, Specialty Post Hole Diggers and Fencing Tools. **Our extended socket with extended boot step shovels also call S500 Industrial™ home.**

SEYMOUR® S400 JOBSITE

CONTRACTOR GRADE CONSTRUCTION, COMPONENTS & CRAFTSMANSHIP

Dedicated labeling for both fiberglass and hardwood models ensure that at the point-of-purchase the product are clearly explained - nothing cookie cutter about the labeling or the S400 Jobsite™ tools!

Fiberglass tools feature:

- **PermaGrip™** - A rivetless ring of steel connects the shovel neck, handle and fiberglass insert, making it one solid unit. Provides the strongest head-to-handle connection.

- Contractor grade fiberglass handles with **heavy-duty and durable fiberglass insert for added strength.**

S400 Jobsite™ is an extremely comprehensive assortment of tools. Shovels, Rakes, Scoops, Post Hole Diggers, Brooms, Pruning Tools...S400 Jobsite™ is up to any task!

SEYMOUR® S400 SAFETY

BE SEEN, BE SAFE - HIGH VISIBILITY CONTRACTOR GRADE TOOLS

Just like our S400 Jobsite™ tools, the S400 Safety™ feature:

- **PermaGrip™** - the same head-to-handle connection we use on Structron®, no skimping on strength here.
- Contractor grade fiberglass handles with **heavy-duty and durable fiberglass insert for added strength.**
- 16 Gauge blades for shovels.

SEYMOUR® S300 DURALITE™

DURABLE TOOLS THAT MEAN BUSINESS

Shovels, Rakes, Post Hole Diggers, Garden Tools, Wheelbarrows and Snow Tools... S300 DuraLite™ occupies a strong footprint in our assortment as durable tools.

Fiberglass tools feature:

- **PermaGrip™** – A rivetless ring of steel connects the shovel neck, handle and hardwood reinforcing rod insert, making it one solid unit. Provides the strongest head-to-handle connection.

S300 DuraLite™ offers exceptional value, **absolute continuity with the rest of the Seymour Midwest brand levels from a planogram perspective** and as always worthy of wearing the Seymour® name!

SEYMOUR® S200

Our 'good' offering is truly special. **Contoured handles with a clear lacquer finish** are features that are second to none. And towards our goal of providing a coherent merchandising platform regardless of the series displayed in your store, **we've invested in blade labels that follow the updated Seymour Midwest format and a series pad print on the handle.** We wouldn't put our name on it if it wasn't good enough to be a Seymour® tool.

MIDWEST RAKE®

The best way to **incrementally grow your business with Seymour Midwest** – add the Midwest Rake specialty coatings tools that are trusted by coatings experts and concrete decor artisans worldwide.

- Innovative high quality patented tools for the coatings industry.
- Widest selection of pro-grade tools and supplies for applying coatings and decorative concrete applications.
- Smart new merchandising solutions and displays.
- Dedicated and knowledgeable sales support to help you grow your business.
- All the tools for any task on a single purchase order.

To request the Midwest Rake® Coatings Catalog – please call 844-SEYMOUR, email us at Customer.Service@SeymourMidwest.com, or visit <https://seymourmidwest.com/catalogs-brochures>.

TOOLS FOR PROFESSIONAL LANDSCAPERS & IRRIGATION CONTRACTORS

Polymer, fiberglass, hardwood – 28° and 35° angle options...that adds up to a lot of trenching shovel options, 24 to be exact and we wouldn't have it any other way. Everyone has their preference when it comes to trenching shovels and **we're here to make sure you have the exact option you, your crew and the job require.**

The same logic and **completeness of product line** is the hallmark of the Kenyon S550 Irrigation™ offering.

Kenyon is the home of specialized irrigation and landscaping tools.

Toolite® S550

MUD & MUCK

MUD & MUCK RELEASING BLADES

Patented "Releasing" Perforated Blade Engineered for Working with Saturated Materials & Sifting

- Breaks Suction When Working in Wet Soils.
- Allows Excess Water to Drain Through Perforations.
- Has Less Surface Area Decreasing the Tendency for Wet Soil to Adhere to the Blade.
- Blade Design is Lightweight, Ergonomic & Will Cause Less Fatigue.
- Superior Tool for Digging in Mud, Muck, Clay & Water Saturated Materials.
- Superior Tool for Sifting Debris from Sand, Gravel & Grain.
- Polymer, Fiberglass & Hardwood Handles.

U.S. Patent 5,601,325

Canada Patent 2,238,027

Mexico Patent 207,533

LINK HANDLES®

AMERICAN-MADE HARDWOOD REPLACEMENT HANDLES

OVER 8,000 HANDLE STYLES AVAILABLE

LINK HANDLES vs. COMPETITIVE

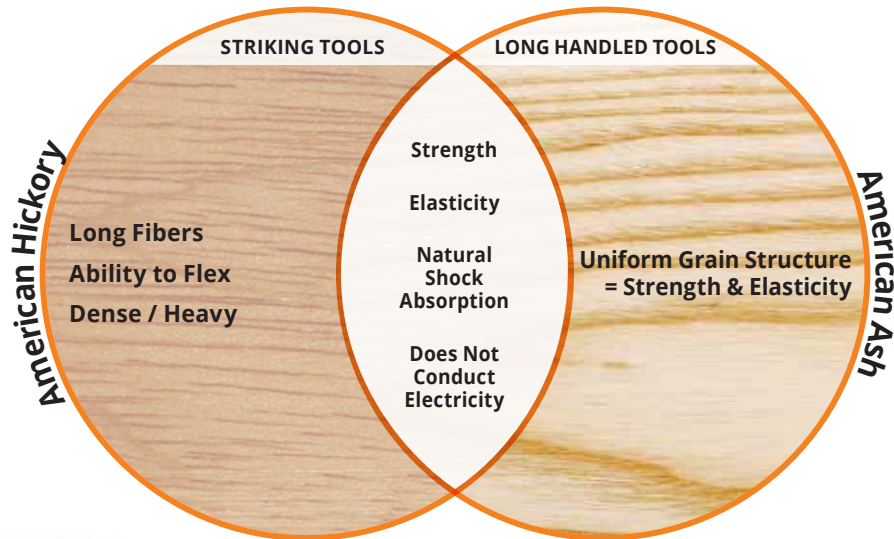

25% Larger Blank	vs.	Thin, Flat Board
Compound Curves	vs.	Smoothed & Rounded
Ergonomics Engineered for Application	vs.	Shaped Handle

Our handle shape always works with the user. The handle becomes an extension of the body to provide better comfort, control, and safety.

AMERICAN HICKORY & AMERICAN ASH

IDEAL GEOGRAPHY FOR:

- SOIL
- RAINFALL
- SUNSHINE

Hickory Trees Grow Slowly & Uniformly For Exceptional Strength

SHOVELS - ROUND POINT / DIGGING

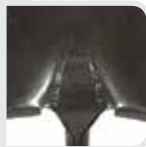

SUPER SHOVEL®: BEST FOR TOUGH SOIL

Our Super Shovel® tools have "cutting teeth" to penetrate hard-packed, rocky and clay soils and also chop through roots and sod. They're 100% made in Seymour, Indiana USA.

WHY CLOSED BACK?

Closed back shovels have welded backplates to prevent material build-up. These plates also provide extra strength.

SHOVELS - ROUND POINT / DIGGING

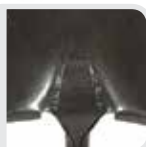

SUPER SHOVEL®: BEST FOR TOUGH SOIL

Our Super Shovel® tools have “cutting teeth” to penetrate hard-packed, rocky and clay soils and also chop through roots and sod. They’re 100% made in Seymour, Indiana USA.

WHY CLOSED BACK?

Closed back shovels have welded backplates to prevent material build-up. These plates also provide extra strength.

MUD & MUCK

PATENTED "RELEASING" PERFORATED BLADE ENGINEERED FOR WORKING WITH SATURATED MATERIALS & SIFTING

- Breaks Suction When Working in Wet Soils
- Allows Excess Water to Drain Through Perforations
- Has Less Surface Area Decreasing the Tendency for Wet Soil to Adhere to the Blade
- Blade Design is Lightweight, Ergonomic & Will Cause Less Fatigue
- Superior Tool for Digging in Mud, Muck, Clay & Water Saturated Materials
- Superior Tool for Sifting Debris from Sand, Gravel & Grain
- Polymer, Fiberglass & Hardwood Handles

MUD & MUCK

PATENTED "RELEASING" PERFORATED BLADE ENGINEERED FOR WORKING WITH SATURATED MATERIALS & SIFTING

- Breaks Suction When Working in Wet Soils
- Allows Excess Water to Drain Through Perforations
- Has Less Surface Area Decreasing the Tendency for Wet Soil to Adhere to the Blade
- Blade Design is Lightweight, Ergonomic & Will Cause Less Fatigue
- Superior Tool for Digging in Mud, Muck, Clay & Water Saturated Materials
- Superior Tool for Sifting Debris from Sand, Gravel & Grain
- Polymer, Fiberglass & Hardwood Handles

SHOVELS - GARDEN SPADES

Landscape and construction contractors who do heavy digging love our Kenyon all-steel products. They provide the best in rock-moving, root chopping and prying capabilities.

Constructed of ultra-thick, heavy-weight 9 gauge welded steel with a smooth powder coat, these tools are ready for extreme applications.

WHY CLOSED BACK?

Closed back shovels have welded backplates to prevent material build-up. These plates also provide extra strength.

Shingle removers & notched roofing spades have a heavy-duty fulcrum welded to the back of the blade for leverage.

ULTIMATE SHINGLE REMOVER

The 49749 is a professional quality tool that makes shingle and nail removal easier. It has an extra strong steel brace and carbon steel skid plate.

WHY CLOSED BACK?

Closed back shovels have welded backplates to prevent material build-up. These plates also provide extra strength.

POST HOLE DIGGERS - PERFECTION, GIBBS, BUCKEYE, LONESTAR

THE PERFECTION PATTERN

Has a unique "clamshell" head for digging in sandy, loamy, loosely-packed soils.

THE GIBBS PATTERN

Combines a single blade with hinge action that acts like a bucket to bring loose soil to the surface. Also called a mud bucket.

THE BUCKEYE PATTERN

Features strong steel pipe handles welded to the square steel shanks and yoke. Super tough square-cut steel blades are ideal for digging in heavy, rocky soils.

THE LONESTAR PATTERN

Features strong tubular steel handles welded to the thick yokes for digging in the hardest soils.

SP16005 - Perfection Blade

SA11003 - Gibbs Blade with Rivets

SP21008 - Gibbs Short Lever Replacement Handle

SP21006 - Replacement Handle for Gibbs Digger

TREE FEEDING AUGERS

Bore a 2" diameter hole for applying plant food and water to roots.

IWAN AUGERS

Are designed for general purpose use in a variety of soils. Steel blades are riveted to tough pliable iron yoke. Has a steel shaft with a welded steel t-handle.

ADJUSTABLE IWAN AUGERS

Will bore holes of varying diameters.

DIGWELL AUGERS

Have a telescoping steel handle for a total working length up to 9'. The square steel extension is dimpled at 7" intervals for locking in settings.

SA11026 - 6" Iwan Auger Head
SA11022 - 8" Iwan auger head
SA11020 - 10" Iwan auger head

RAKES - STEEL TINE LEAF RAKES

S600 & S500 SPRING BRACE RAKES:

- Oversized heavy-duty replaceable spring (SMW #40955)
- 1" powder-coated aluminum handles while our heavy-duty rakes have 15/16" hardwood handles
- Double through-bolted head-to-handle connection
- 24" head with 24 heavy-duty steel continuous tines or 18" head with 18 heavy-duty steel continuous tines

Our **SPRING BRACE LEAF RAKES** are built better to last longer. Intelligently-designed features include continuous tines from handle to tip and a durable spring brace that gives you the power to dig into thickly-matted leaves. Most of our rakes have single or double through-bolted heads that won't get loose or wobbly.

SUPERIOR STRENGTH: WELDED AND RIVETED

Our Kenyon S550 Irrigation™ (42604 & 42600) are heavy-duty and long lasting tools. The head-to-handle connection features a unique tapered steel plug that is press fit into the powder-coated aluminum handle and then drilled and riveted all the way through. The bow rakes also feature a steel bow that is moved closer to the edge of the head, providing greater lateral stability, and is welded on both the front and back sides of the head for greater strength.

RAKES - STONE, LEVEL HEAD, ASPHALT & THATCHING

LEVEL HEAD RAKES have teeth designed to gather small weeds and straw. They are also ideal for raking small clods and for seedbed preparation while the flat side is used for leveling.

WHY THATCH?

Flanged teeth on both sides are designed for removing then collecting thatch and dead grass from lawns.

ASPHALT RAKE ADVANTAGES:

Heavy-duty construction, designed for tough use in asphalt paving. Long shank for extra reach to prevent asphalt build up.

RAKES - FIELD & LANDSCAPE

LANDSCAPE RAKES

Have rounded teeth which provide a smooth non-gouging raking action, while its striking edge is excellent for grading. Strong wrap-around bracing and heavy-duty double rib construction maximizes head stability and ensures long-lasting performance, even under the heaviest professional use.

GREAT RAKE II

The name says it all... this is a "great rake" for raking and leveling. The long curved teeth provide more efficient grading on the backstroke, while the deep grading edge allows for superior leveling.

1

HOMEOWNER LANDSCAPING

Designed with the consumer in mind, the 90324 & 90330 landscape rake comes complete with a solid aluminum head, "push-pull" bracing to eliminate head wobble, and a 60" hardwood handle.

3

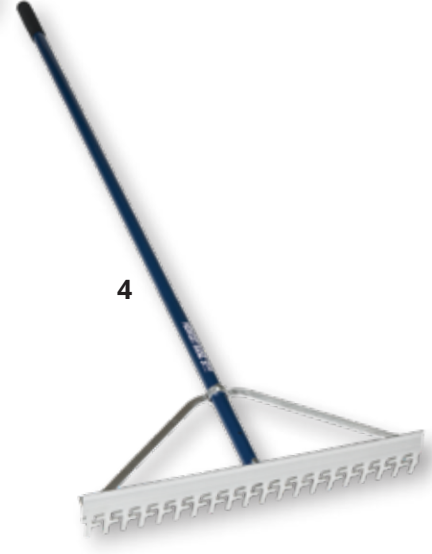

SCREENING RAKE DESIGN

This rake is specially designed for sifting, grading, and screening. It is an excellent tool when you need to sift or screen stones and debris from sand or fine soil.

WHY A DUAL PURPOSE RAKE?

A Seymour Midwest exclusive. This innovative and versatile tool has two teeth profiles. The short teeth are used for breaking up hard packed clay and grading, while the long teeth are for wet clay and general raking.

CHISEL TOOTH RAKE DESIGN:

The aggressive chisel-sharp teeth and forward grading edge set this rake apart from our others. It is an excellent choice when you need to penetrate and break up hard soils. It also works exceptionally well when spreading concrete or stone.

WHAT IS A MCLEOD RAKE?

A favored tool for firefighters when clearing fire lines, but also a heavy-duty tool for clearing any form of trail or pathway... or even creating a new planting bed or garden. The head measures 9" tall x 11" wide with 4" reinforced teeth.

SP13580 - McLeod Rake Replacement Head
SA30001 - Braces, Wrap Around, Set of 2
SP13470 - Steel Replacement Head for Backfill Rake

MORE EFFECTIVE THAN A SHOVEL

For many landscaping, irrigation, and utility settings. A great tool for quickly backfilling trenches and moving soil and aggregate materials. Heads are replaceable.

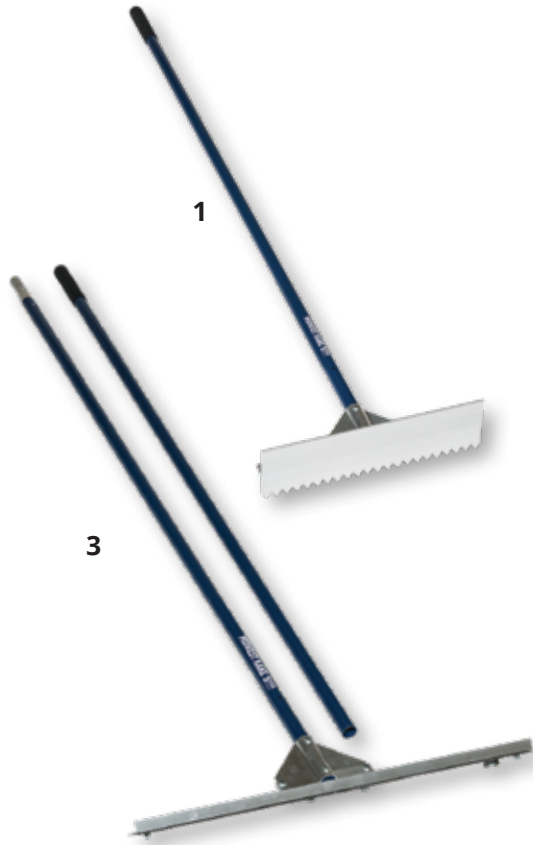

COMPACT FOR A PURPOSE

A compact 50" length rake that fits in a trailer tack box. This small 14" head size has straighter pitched teeth and a generous grading edge and is easy to handle.

A "UTILITY INFIELDER" YOU CAN PLAY EVERYDAY

The perfect size for restoring the pitching mound to a professional surface, just scarify, level, tamp and repeat. Great for shaving and carving the pitching mound. The flat front of this tool can be used as a tamp in secondary areas where light tamping is required.

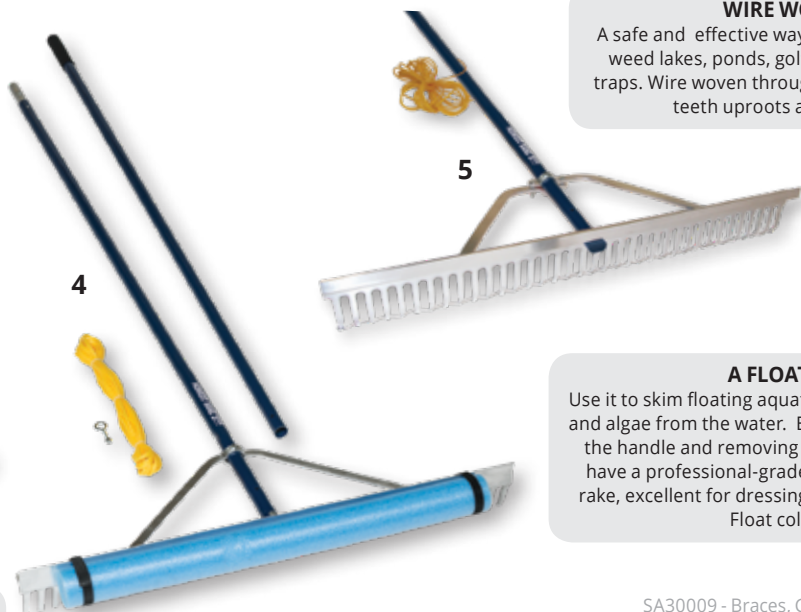

2

**THE PROFESSIONALS CHOICE**

Knocks down for easy storage. The perfect tool for grooming infields and beach volleyball courts. The head was designed specifically for the sports turf industry, but it is also highly respected in the professional lawn and garden industry. The high straight edge is excellent for grading.

WIRE WOVEN TEETH

A safe and effective way to seasonally weed lakes, ponds, golf course water traps. Wire woven through heavy-duty teeth uproots aquatic weeds.

**A FLOATING RAKE?**

Use it to skim floating aquatic vegetation and algae from the water. By shortening the handle and removing the float, you have a professional-grade landscaping rake, excellent for dressing beach sand. Float colors may vary.

SIMPLY AN AWE-SOME TOOL

The AWE, exclusive to Seymour Midwest, is the most effective bottom-cutting weed removal tool available on the market. No need for dangerous and expensive chemicals; this tool removes weeds at their source. You don't have to worry about the reinforced blades bending under a heavy load of weeds.

THIS POTATO/REFUSE FORK is more versatile than its name implies. Its tines are sturdy and ideal for digging or harvesting potatoes and similar types of vegetables. It can also be used to transfer manure and loose material or even for general garden clean-up.

BEDDING FORKS are designed to remove manure from stock bedding. They also work great for spreading mulch, compost and sifting leaves.

GENUINE AMERICAN
HICKORY HANDLES

AMERICAN HICKORY AND ASH

The best replacement handles are made from American hickory because of their strength, elasticity, and ability to absorb shock. Hardwood handles do not conduct electricity.

SHOCK-ABSORBING AMERICAN HICKORY

American hickory is dense, heavy, and a natural shock absorber making it ideal for striking and cutting tool handles.

The long fibers and unique cell structure of American hickory allow it to flex repeatedly and return to its original shape. It absorbs and dissipates shock before it reaches the user's hands.

THE DIFFERENCE IS REAL™!

Turned handles are ergonomically superior to shaped handles:

Shaped handles are made from thin flat boards that are smoothed and rounded on the top and bottom. Shaping is a faster and less costly way to make handles.

Turned handles are made on a lathe from wood blanks that are about 25% larger than the flat boards. The result is a handle that has ergonomic grips and contours.

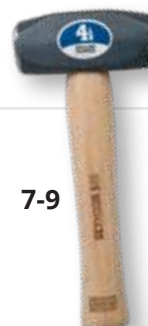

Anyone who holds a shaped handle and then a turned handle will immediately feel the comfort and higher quality of the turned handle. We choose to use the turned handle method.

MICHIGAN DOUBLE BIT AXES

General purpose axes used to fell small trees, split wood, trim branches, and prune trees. Having two bits lengthens the time between blade sharpening.

PULASKI / LANDSCAPING AXES

Combine a single bit axe blade with a mattock blade. This blade combination makes it ideal for fighting forest fires and for a variety of landscaping applications.

SPLITTING MAULS

SPLITTING (WOODCHOPPER) MAULS
Used to split wood. The blade is designed to split rather than cut and the heavy sledge-end adds power to the stroke.

CUTTER MATTOCKS

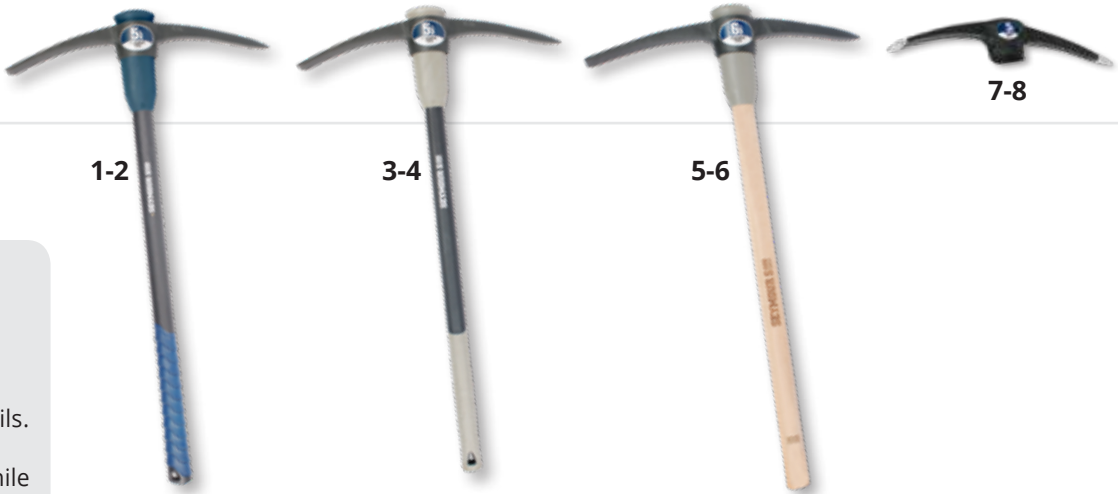

Combines an axe-like cutter blade with a mattock blade. They are used to chop and dig, especially in hard dirt or clay soils. The cutter blade can be used to cut roots and loosen hard soil. The mattock blade is used to dig or remove loose soil.

PICK MATTOCKS

Combines a pick blade with a mattock blade. They are used to dig or grub, especially in hard dirt or clay soils. The pointed pick blade can be used to loosen hard soil while the broader mattock blade is used to dig or remove loose soil.

TAMPERS & WEDGES

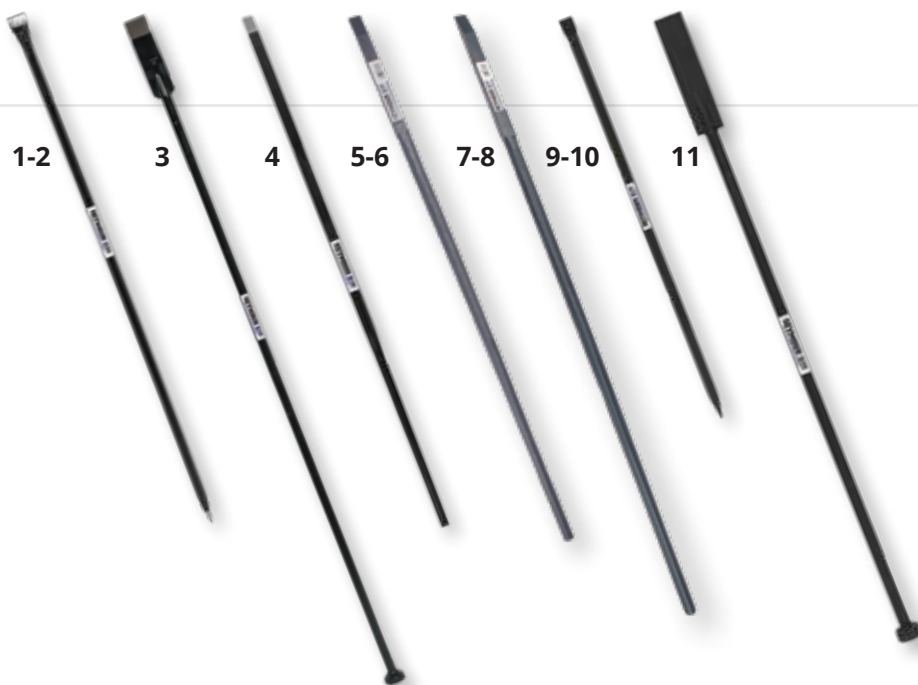

TAMPERS make it easy to compact loose soil, sand and aggregate. They are a must-have tool for preparing a foundation for paving surfaces on drives, walks and patios. They also prized for compacting trenches and for making sod repairs.

WRECKING (GOOSENECK) BARS
Used to pull nails and to pry apart wood. They have a nail puller head on the gooseneck end. The gooseneck provides leverage for heavy pulling. The other end has a bent chisel head for prying.

**SAN ANGELO BARS**

Chisel head on one end and a diamond point on the other end. They are used to pry and dig.

POST HOLE TAMPING BARS

Chisel head on one end and a tamper point on the other end. The chisel end is used to dig or loosen soil in post holes. The tamper end is used to pack the soil around posts that have been set in the holes. Also great for moving rocks from soil.

WEDGE POINT CROW BARS

Wedge shaped point. They are used to pry or move heavy objects and to split or separate wood, metal, or concrete forms.

PINCH POINT CROW BARS

Slanted point. They are used to pry or move heavy objects and to split or separate wood, metal, or concrete forms.

WHEELBARROWS - EXCAVATOR®

EXCAVATOR CONSTRUCTION:

- All steel design assembles in less than 10 minutes
- The 6 cubic foot tray is reinforced at the bottom with a heavy-duty 1/4" thick "H" shaped support to prevent damage when used for hauling rock or concrete
- The front roll bar supports heavy loads when dumping
- The location of the cross bar does not impede step

WHY CONTRACTORS PREFER "FLAT-FREE" TIRES:

- No employee down-time due to flats
- Roll over nails, glass, staples without worries
 - Eliminates maintenance and spare parts
 - No need to carry an air pump
 - Same bounce and load handling
 - Abrasion, chemical and UV resistant

SP50080 - Replacement Grips for Wheelbarrows

63201 - Replacement Tire for 85730 & 85732

SUPERHANDLE® II DUAL LOCKING SYSTEM

The world's first extension handle with two locking systems to ensure the most secure handle lock available today. Built to industrial quality standards for outstanding performance and durability.

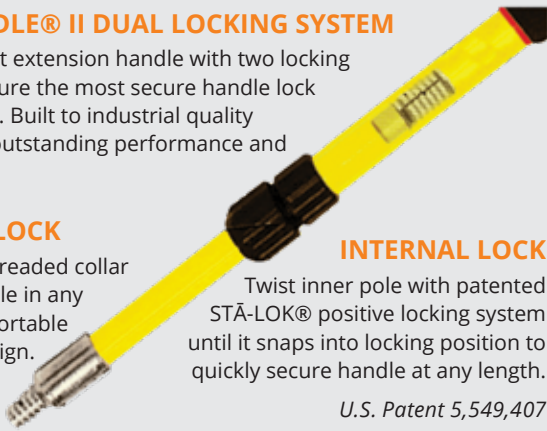

EXTERNAL LOCK

Screw down threaded collar to secure handle in any position. Comfortable ergonomic design.

INTERNAL LOCK

Twist inner pole with patented STA-LOK® positive locking system until it snaps into locking position to quickly secure handle at any length.

U.S. Patent 5,549,407

UPGRADE TO ULTRA

Our new "Ultra" version includes a virtually indestructible threaded tip milled from solid aluminum bar stock. Use it for heavier-weight ends or when the tool end will be subject to high leverage forces.

We offer the industry's widest selection of replacement handles that help you extend the life of your trusted tools. With over 6,000 handle patterns available, we can provide an exact match that fits the tool with an ergonomically-superior turned design.

LINK HANDLES®

FACTS TO KNOW WHEN SELECTING A REPLACEMENT HANDLE

Tool handles can be made from a variety of hardwoods as well as fiberglass and steel. Each material has certain advantages and disadvantages for replacement handles.

American hickory and ash

The best replacement handles are made from American hickory and American ash because of their strength, elasticity, and ability to absorb shock. Hardwood handles do not conduct electricity.

Shock-absorbing American hickory

American hickory is dense, heavy, and a natural shock absorber making it ideal for striking and cutting tool handles.

The long fibers and unique cell structure of American hickory allow it to flex repeatedly and return to its original shape. It absorbs and dissipates shock before it reaches the user's hands.

The best hickory is grown in the Tennessee region of the USA

The best American hickory logs come from Tennessee, Kentucky, North Carolina, and South Carolina. This region has the ideal combination of soil minerals, rainfall, and sunshine to produce trees that grow slowly and uniformly for exceptional strength.

Wood from slower growing trees is denser and thus stronger than the lighter wood that comes from faster growing trees.

All Link hickory comes from the Tennessee region of the USA. Some hickory grows in the northeastern United States, but it is generally of lower quality than the hickory grown in the Tennessee region.

American ash handles for agricultural tools

Many agricultural tool handles such as shovels, rakes, and hoes are made from American ash. It has a uniform grain structure that provides both the strength and the elasticity needed for the bending stresses these tools must endure.

Other hardwoods

When ash or hickory is not used, other hardwoods suitable for the application are selected.

While ash gives the finest strength to weight ratio, handles of other hardwoods are appropriately selected for many types of tools.

Fiberglass handles

Fiberglass handles are strong, lightweight, and do not conduct electricity. Fiberglass, however, is not flexible and *does not absorb shock*. Fiberglass handles cost more than hardwood handles.

Link offers fiberglass replacement handles.

Steel handles

Steel handles are extremely strong, but they are *heavy* and *expensive*. They are *not flexible* and *do not absorb shock*. Steel handles conduct electricity.

Vintage logo from the Sequatchie Handle Works

Choose our shock-absorbing hickory handles for striking or cutting tools. The unique fibers of **American Tennessee hickory** provide outstanding **durability and shock absorption** for less wear-and-tear on the user. It's no wonder why drumsticks are made of hickory!

THE DIFFERENCE IS REAL™!

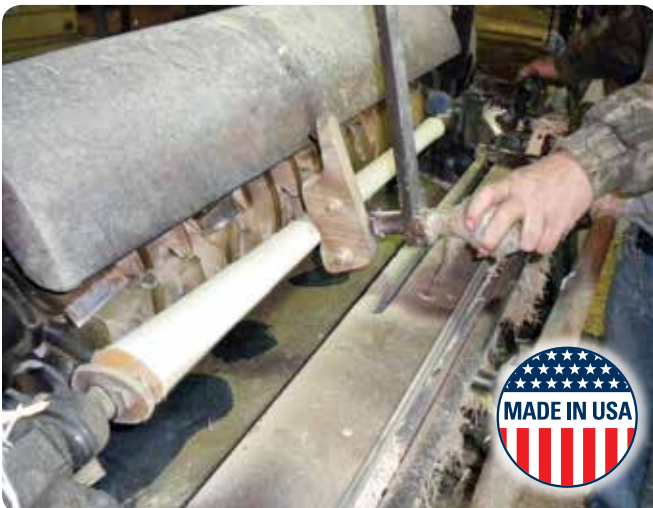

Turned handles are ergonomically superior to shaped handles

There are two ways to produce handles: shaping and turning.

Shaped handles are made from thin flat boards that are smoothed and rounded on the top and bottom. Shaping is a faster and less costly way to make handles.

Turned handles are made on a lathe from wood blanks that are about 25% larger than the flat boards. The result is a handle that has superior grips and contours.

Anyone who holds a shaped handle and then a turned handle will immediately feel the comfort and higher quality of the turned handle. Link Handles chooses to use the turned handle method.

The best replacement handles are turned rather than shaped. Turning results in ergonomically-superior handles that provide better comfort, control, and safety.

Shaped

Turned

Only Link Handles offer superior ergonomic design

Link handles are designed with the best combination of length and contours so the user can best hold the handle and use the tool.

Our handle shape always works with the user. The handle becomes an extension of the body to provide better comfort, control, and safety.

WE TAKE THESE STEPS IN MAKING EVERY TURNED AXE HANDLE:

1. Start with an American Tennessee Hickory Log

2. Axe wood square or blank.

3. Half turned axe handle.

4. Full rough turned axe handle.

5. Axe handle after sanding.

6. Finished axe handle with label and wedge.

Link Handles have set the industry benchmark for when it comes to what customers care about most: consistent quality, outstanding ergonomics and exact fit matches to over 6,000 tools.

LINK HANDLES®

ALL HANDLES ARE CAREFULLY GRADED & SORTED

LINK's experienced timber buyers grade log quality. They are looking for logs that are heavy and defect-free.

When the logs are sawed into squares (or blanks), the squares are graded. After the squares are turned into handles, they are graded again.

PRIMARY LOG QUALITY FACTORS

Some of the factors used to determine quality include:

STRAIGHTNESS OF GRAIN

MOISTURE CONTENT

DENSITY

FREEDOM FROM DEFECTS

WOOD COLOR NOT A QUALITY FACTOR

Color of the wood is not a factor in determining the quality of hickory handles. The best hickory handles may be all white, red-and-white, or all red.

LINK AMERICAN HICKORY QUALITY LEVELS

01 Best quality American hickory with sanded finish and yellow non slip grip. Meets or exceeds all government "A" specifications. Ideal for the most demanding industrial and commercial applications.

02 Best quality American hickory with a wax finish. Meets or exceeds all government "A" specifications. Ideal for the most demanding industrial and commercial applications.

04 Better quality American hickory with a wax finish. Ideal for frequent heavy-duty use by farmers, ranchers, contractors and other professionals with demanding construction and other professional applications.

19 Better quality American hickory with a clear lacquer finish. Fire finish provides a highly pleasing appearance. Ideal for frequent heavy-duty use by farmers, ranchers, contractors and other professionals with demanding construction and other professional applications.

AMERICAN ASH					
18	Best	Clear lacquer			Industrial, commercial
21	Better	Clear lacquer			Contractor, homeowner

Link replacement handles allow today's consumer or professional contractor to get additional years of life out of trusted tools by replacing cracked, worn or broken handles. Handy merchandising units act as silent salesmen, guiding customers to the correct replacement.

THERE IS NO SUBSTITUTE FOR A GOOD DISPLAY

- Let customers know you carry common replacements.
- Illustrated display banner shows and tells which tools each handle fits.
- Simple plan makes every clerk an instant replacement handle expert.
- Makes selection easy for customers.
- Requires minimum space.
- Organized and neat.
- Strong and attractive rack.
- Available in 5, 8, and 12 hook models.
- Available in wall or floor versions.
- Easily customized to your exact needs.
- Improves inventory control.
- Simplifies re-orders.
- Increases sales profits.

The wall mount displays can be used as floor displays by using the floor stands (ordered separately).

ALL PRODUCTS ON THIS PAGE ARE MADE IN THE USA (UNLESS NOTED)

ROUND (CONE-SHAPED) STEEL WEDGES

- Expands wood equally in all directions for tightest fit.
- Provides better holding power than flat wedges.
- Eliminates need for flat wood and steel wedges.
- Two sizes fit every need.

Contoured top rim helps keep wedge in place

Beveled bottom rim shears wood fibers and compresses them toward the center

Wood expands into interior of wedge to create a secure and safe grip

ROUND STEEL WEDGES, RETAIL PACK

Each retail package contains 2 round steel wedges. Includes step-by-step instructions and diagrams.

BETTER BY DESIGN

When your customers buy tool handles, they need handles with proper fit. The handle becomes an extension of their bodies and determines the comfort of the user. Link handles provide the time tested ergonomic shape and design that allows for better control, comfort, and safety.

SOD LIFTER, EDGERS, ROLLER & SPREADER

Our lawn roller helps even-out new sod installations and holds up to 270 lbs. (approx. 28 gallons) of water.

Edgers create crisp turf boundaries along walkways, driveways and other paved surfaces. Gardeners and landscapers appreciate the easy, precise cuts from our half-moon edger.

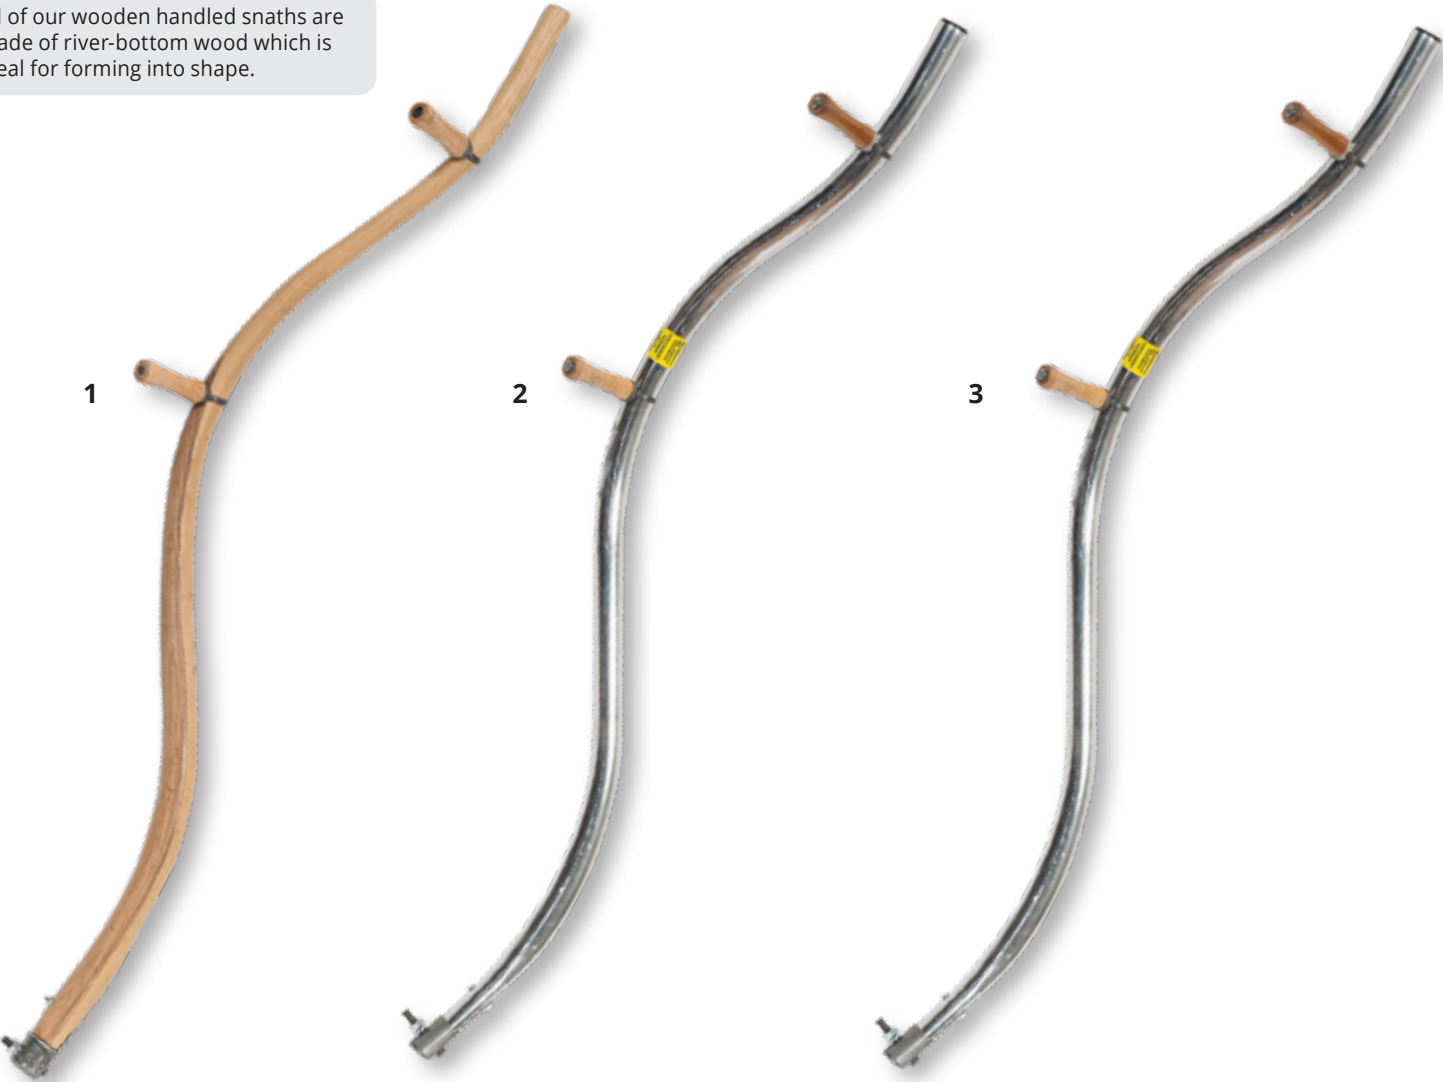

Our compost spreader is often used for topdressing existing lawns.

The scythe is a powerful, versatile and useful tool for the mowing and removal of unwanted grasses, weeds, and young woody growth. Quiet and pleasant to use, the scythe provides numerous advantages over mechanical mowers and string trimmers, and can be used in many locations where mechanical mowers cannot.

EXTENSION HANDLES

The 41463 features a dual lock and STÅ-LOK® positive locking system (SA32002) that increases the reach of Structron® loppers and hedge shears.

COMPOUND ACTION LEVER DESIGN

The 41463 & 41461 pruning tools multiplies handle force to cutting blades for easier cutting.

For cutting larger limbs and vines, select from our wide offering of landscape loppers. Choose from models with traditional hardwood handles, fatigue-reducing aluminum, fiberglass, or high-strength tubular steel. Models with easy-reach extension handles are offered.

Our long-handled garden tools are the perfect fit for garden beds, smaller spaces and smaller hands. They are smaller and easier-to-use but are constructed of the same materials as our larger tools. Their versatility extends to floral or edible gardens, square-foot gardening, raised beds and use by children.

Building a better professional broom starts with our super-strong gusset bracing, the strongest head-to-handle connection on the market today. Choose from brooms for rough surfaces, smooth surfaces or "duo" models that combine bristles for all-purpose use. Our bent "ergonomic" aluminum handles provide more effective head-to-surface contact while promoting comfort and ease of use.

Our duo brooms have a highly effective sweeping action because of its strong inside bristles with outside bristles specifically designed to sweep the finest of materials.

BROOMS - WONDER & GENERAL PURPOSE

1

2

3

82602 is an ideal combination broom for gardeners, landscapers and anyone wanting to move a heavy load as well as fine dust with the same broom.

82614 is for smooth and semi-smooth surfaces such as warehouse floors and cement. The best value for maintenance dollars spent.

82624 bristles are unaffected by chemicals, oils, or petroleum solvents. A top performing, best selling garage style broom.

4

5

6

Our general purpose brooms use durable polypropylene bristles, firmly attached to a high quality hardwood shoulder.

SNOW TOOLS - SLEIGH SCOOP, SNOW SQUEEGEES & ROOF RAKES

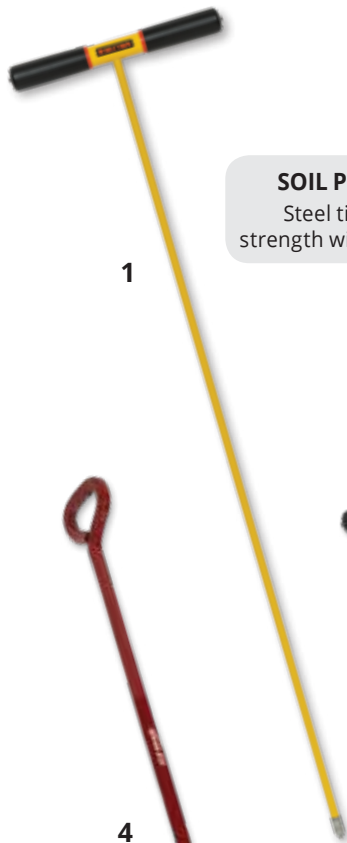

SLEIGH SCOOP

- Large bucket for efficient snow removal.
- Designed for optimum comfort and efficiency
- Ideal for snow heavy removal
- Ideal for driveways, walkways and commercial areas
- Robust construction suitable for professional use
- Tested for use at -40 F
- Shaft: 36"
- Blade: 24" x 31"

1

SOIL PROBE TIPS
Steel tips provide strength with light weight.

2

3

WIRE & SWING PIPE PLACER TIPS
The .75" hard nylon tip is non-conductive. It grips the cable to place it into the trench bottom.

4

ALL-STEEL CONSTRUCTION

- Heavy-duty 3/4" hex shaft
- Dig-out spike
- Steel leverage step
- Sure-grip handle
- 36" overall length

5

GENEROUS STEPS

An all-steel tool for installing landscape lighting, irrigation line, landscape edging and more. The 4 gauge head is 8-1/4" wide and nearly 10" long with a 1-1/4" generous step.

IRRIGATION - MEASURING TOOLS

KENYON PROGRADE MEASURING WHEEL

- Heavy-duty 3/4" steel tube frame and handle
- Wheel is positioned in the center of frame
- Folds in half for storage and portability
- 5 digit, easy-to-read counter
- Comes with mud scraper

KENYON SMALL TELESCOPING MEASURING WHEEL

- Fits in a toolbox or briefcase
 - Geared counter
- Adds while rolling forward and subtracts when pulled in reverse
- Weights less than 2 pounds

KENYON GROUNDCAPERS

- Molded ABS wheel
- Telescopic metal handle with kickstand
- Geared counter
- Lightweight and durable

KENYON WIDE-TRAK MEASURING WHEEL

- Solid and wider wheel for excellent balance
- Heavy-duty 3/4" steel handle
- 5 digit, easy-to-read counter

EASYSQUEEGEE®

CLEANABLE & REUSABLE

US PATENT 10,165,923

PRECISION APPLICATION SQUEEGEE SYSTEM

FINALLY A TRULY CLEANABLE & REUSABLE
PRECISION APPLICATION SQUEEGEE SYSTEM

The **self-locating** & **self-leveling** blades ensure your blade is straight, level and in perfect contact with the floor every time.

The eight unique engineered blades provide a level of versatility and jobsite application options not currently available from any competitive application squeegee tool today.

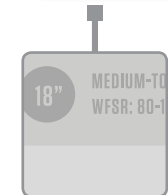

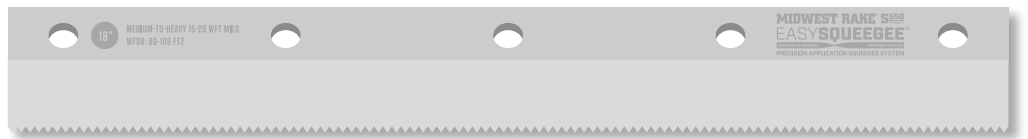

Cured Coatings Release technology ensures the frame is reusable regardless of the material (Epoxy and Urethanes) you're putting down with the **EasySqueegee®**, once cured the frame can be cleaned.

FLAT FLEXIBLE

FLAT STIFF

5-7 WFT MILS
WFSR: 230-320 FT² / GAL8-12 WFT MILS
WFSR: 133-200 FT² / GAL15-20 WFT MILS
WFSR: 80-106 FT² / GAL25-30 WFT MILS
WFSR: 53-64 FT² / GAL40-45 WFT MILS
WFSR: 36-40 FT² / GAL50-60 WFT MILS
WFSR: 26-32 FT² / GALINTELLIGENT BLADE
IDENTIFICATION

All blades inscribed
with WFT and WFSR
information.

SELF-LEVELING
BLADES

Accurate and
predictable Wet Film
Thickness every time.

SELF-LOCATING
BLADES

Designed to provide
industry leading
accuracy.

PROTECTED
THREADS AND
FASTENERS

Eliminates material
contact with threads.

THUMB SCREWS
REPLACE NUTS

Features Cured Coatings
Release Technology
for cleanability.

Wet Film Spread Rates (WFSR FT² / Gal.) are not absolute but provided to assist blade selection. Many factors can contribute to the actual WFSR including pressure exerted on the blade, porosity of the substrate being coated, material used and if and how the back-roll is completed. If you have any questions or would like to discuss the particulars of your project please contact us.

SPEEDSQUEEGEE™

HOW WE DIFFER FROM THE COMPETITION:

- Designed for applying resinous flooring materials such as epoxy and urethanes
- Provides industry leading precision, predictability and versatility when compared to competitive products.
- Unique Color Coded Identification of WFT (in mils) and WFSR FT² / Gal.
- Four unique styles of blades (Flat Flex, Flat Stiff, Scalloped Notched and V-Notched) provide the installer with options in the field as to how to best accomplish their project

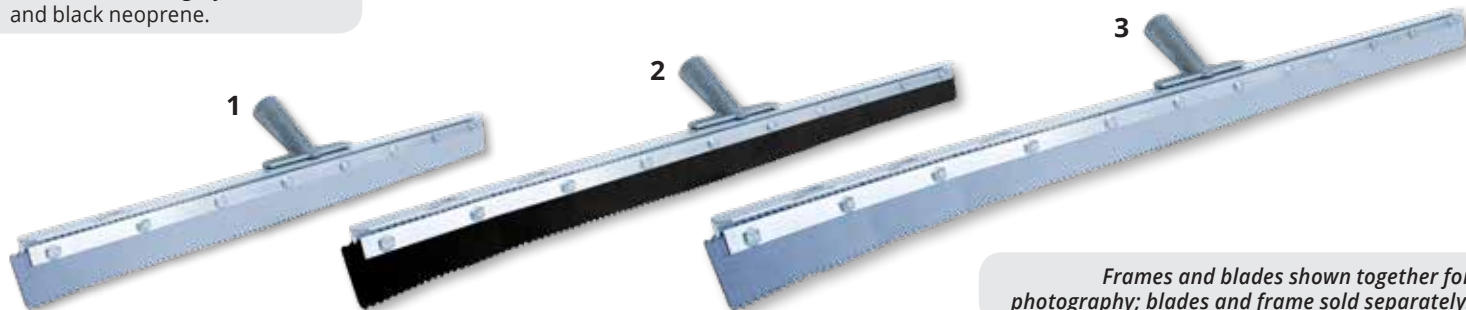

Complete ready to use tool, one-piece frame & blade (not replaceable)

Polymer frame with threaded handle adapter

Available in 2 widths - 18" and 24"

Our general purpose squeegees are ideal for pushing or pulling liquids off from hard surfaces. Each is sold as a complete tool – handle, frame and blade. Our straight-edge squeegee has a stiffer blade for a more robust scraping action. Replacement blades are always available for all of these items. Our rollers have stainless steel axles that roll water off floors, pavement, tennis courts, golf greens and sports fields. The heavy-duty aluminum frame construction and stainless steel axles ensure the roller stays secure.

**PVA
ABSORBENT
ROLLERS**
Are great for
hard surfaces
like concrete
and asphalt.

CONCRETE PLACERS - CONCRETE TOOLS

Our concrete placers are durable but also lightweight to minimize operator fatigue. Choose from aluminum, hardwood or fiberglass handles. The heads can set at varying angles to match the application and are replaceable to renew the tool for additional use.

RING FASTENERS

CUT STYLES OF RING TIPS

HOG RINGS are used to prevent swine from rooting in the ground. They are made from copper coated wire and come in various sizes.

Rings are defined by wire gage or diameter, material properties and cost, pattern, and cut. The ring wire materials below are listed in order of relative cost, with the least expensive listed first. For best value, select the lowest cost material that has the properties needed for the intended application.

BRIGHT BASIC STEEL RINGS are the most economical and are used for general purpose applications such as attaching tags.

COPPER COATED RINGS are economical and used for hog rings and general purpose applications.

GALVANIZED STEEL RINGS are best for applications such as fencing where moderate cost and resistance to rust are important.

ALUMINUM RINGS are relatively expensive, light weight and won't rust or corrode making them ideal for salt water use, cages and traps, and other special requirement applications.

STAINLESS STEEL RINGS are the most expensive and won't rust or corrode making them ideal for salt water use, cages and traps, food industry applications, and other special requirement applications.

HILL PATTERN RINGS close in a triangle shape.

BLAIR PATTERN RINGS close in an oval shape.

PREBENT RINGS reduce the effort needed to close the rings thus reducing hand fatigue.

ROPE TIE PATTERN RINGS are ideal for clamping rope and cable.

UPHOLSTERY PATTERN RINGS are designed to hold fabric to furniture frames.

SLANT CUT RINGS are best for applications requiring penetration such as upholstery and hog rings.

BLUNT CUT RINGS are best for applications such as fencing. They have no sharp points to cut or pierce, making them safer to handle.

NON-OFFSET RINGS close with the tips nearly touching. They are ideal for fastening large diameter materials such as fence wire where a small gap between the tips is OK.

OFFSET RING design allows the ring tips to pass for complete closure. They are best for fastening small diameter materials that could pass through a small gap.

RING FASTENERS are used for fastening wire fences, slit fences, steel mesh for wall reinforcement, fish traps, crab pots, animal cages, upholstery, and attaching tags. They are also used to clamp rubber tie-down straps and for clamping rope. Seymour rings have a variety of uses in arts and crafts such as fastening holiday wreath materials.

TAB-TOP BOXES: Packaged rings come in convenient tab-top boxes that make them ideal for effective pegboard merchandising. Each box holds from 25 to 100 rings depending on the size of the rings.

10-PACK DISPENSER BOX: Packaged ring boxes are packed in convenient dispenser cartons with 10 tab-top boxes in each dispenser carton.

BULK RINGS

Bulk rings prices are listed in the price list and special order rings are available on a quotation basis. For special needs, just provide samples or specifications.

THE PRACTICALLY PERFECT CHARCOAL & FIREWOOD STARTER

FIRE BLOX™
FIRESTARTER

BURNS CLEAN

Seymour Midwest Fire Blox fire starters meet the strictest air quality codes in the country. Product complies with the South Coast Air Quality Management District Rule 1174.Ref.C14

CALIFORNIA PROP 65

Warning: Combustion of this product will result in the emission

of carbon monoxide, soot and other combustion by-products which are known by the state of California to cause cancer & birth defects as well as reproductive harm. For more information go to www.P65Warnings.ca.gov

In California, use of this and other solid fuels may be restricted at times by law. Call 1-877-466-2876 or check www.8774noburn.org before burning.

WHY SEYMOUR FIRE BLOX FIRESTARTERS:

Starts all types of fires

- ***Each piece measures 1.75" x 1.5" x .5"***
- Superior to liquids and other solid starters.
- Great for starting firewood, pellets, coal, and charcoal.
- Eliminates the need for liquids, kindling, and newspaper.

Works great even when it's wet

- Pieces burn hot for about 12 min. for fast, sure starts.
- Lights quickly, even when wet.
- Will ignite even damp firewood.

Safe to use anywhere

- Can't leak, spill, flash, flare-up, or explode.
- Safe to use both indoors and outdoors.
- Non-toxic.
- Stores safely anywhere with long shelf life.

Economical - just pennies per light

- Need only 2 or 3 pieces to start.
- A 24-pc. package provides 8-12 starts.
- Pieces are scored and separate easily.

Burns clean

- Environmentally friendly
- Meets the strictest US air quality codes.

FOR CAMPFIRES -

Use one or more Fire Blox with twigs / wood scraps under the logs. Starts in rain and moderate wind. Ignites even damp wood.

FOR CHARCOAL GRILLS -

Place 3 Fire Blox cubes on edge in charcoal, leaving air space as shown, and light frayed edges of cubes.

FOR FIREPLACES -

Place one or more Fire Blox under at least 3 logs and light; no kindling needed.

FIRESTARTER & STACK-IT BRACKET

Seymour Fire Blox™ capture instant add-on sales in a variety of store environments. Merchandise them with:

- Outdoor grills and outdoor fireplace supplies
- Patio firepits, outdoor heaters and chimineas
- Camping supplies including hunting, fishing and backpacking
- Indoor fireplaces, wood stoves and heaters

THESE CARTONS CONVERT INTO POP DISPLAYS

The 24 box/pack shipper cartons can be quickly converted to an attention-grabbing full-color shelf or counter display with a large header card

7

HEAVY-DUTY STACK-IT BRACKETS™

Steel fixtures used to hold two-by-fours together for storage racks, shelving, workbenches, and stands.

- Protects firewood: They have a unique design that keeps firewood high, dry, and safe from pests and decay.
- Adjustable: They can be built to any length.
- Easy to use: Simple, fast assembly and disassembly without tools, screws or bolts.

COLORFUL FLOOR DISPLAYS

Can double or triple your inventory turns by attracting customer attention and using space efficiently. Great for end-caps, sidewalk displays, and seasonal merchandise. Ask for a complimentary copy of our brand new merchandising ideas guide with many standard display assortments.

STEEL MOBILE RACKS

Are easy to assemble and can be used indoors or outdoors in any weather. They attract customer attention, and display tools and use space efficiently.

USE SPACE EFFICIENTLY AND MAXIMIZE IMPACT

We custom-design planograms to maximize customer appeal and sell-through. Careful planning ensures that premium wall space yields maximum return on inventory investment.

MANY PLANOGRAM OPTIONS ARE AVAILABLE

With a variety of long handled and garden tool assortments. We develop planogram systems for retail hardware, lawn and garden, industrial supply, landscape wholesaler, irrigation wholesaler, utility wholesaler, fencing dealer / distributor, lumberyard, farm and ranch supply, and other markets.

To get started, contact our merchandising experts at Customer.Service@SeymourMidwest.com.
