

Underhill® GULP™ PRO

PREMIUM WATER REMOVAL PUMPS

CARE AND MAINTENANCE INSTRUCTIONS

Introduction

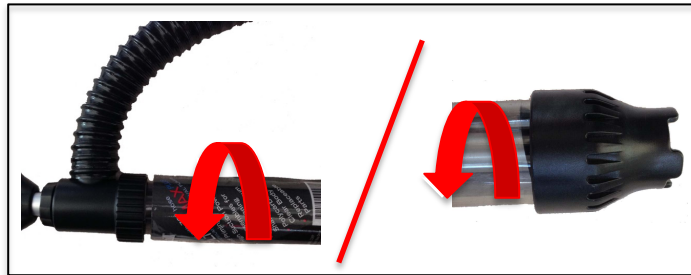

The following are care and maintenance instructions for the Gulp™ PRO hand pump series.

The 36" and 21" Gulp™ PRO as well as the Syringe models can be completely disassembled and cleaned after each use particularly when used in excessively muddy, gravely water.

Cleaning and Care Instructions

The top and bottom portions of the hand-pumps can be loosened in counter-clockwise manner from the pump cylinder as shown in Figure 1-1. These should only be hand-tight and if your hands are wet, dry them before attempting this task.

Loosen the

Top and Bottom Ends of the Gulp™ PRO Hand Pump

Figure 1-1

Thoroughly wash the inside of the hand pump cylinder, then wash both loosened ends. Replacement parts for the current are available, see Figure 2-2 below;

Gulp™ PRO Replacement Parts

Figure 1-2

Verify the wiper seal is in good condition and is not worn. Replace as needed. Lastly before threading the bottom cap onto the cylinder, verify the flapper-valve is flat and not curled.

Re-assemble both ends and hand-tighten only. Your Gulp™ PRO is now ready to work as hard as you.
