# Introducing the NewLite Q-Loc Lighting Connector

## Installation Instructions:

### Step 1:

#### Open Top Locking Bolt:

Turn the top locking bolt counter clockwise until there is a clear pathway through the front opening of the connector. No need to fully remove the locking bolt.

### Step 2:

#### Strip, Fan & Insert Wires:

Strip wires 3/4"-1", Fan and Pre-Twist ends then insert into the connector as far as the wire will travel.

### Step 3:

#### Hand Tighten Locking Bolt:

No need to over tighten. The locking bolt will press against the wire jacket not the bare copper ends; giving it a better hold and secure connection.

### Step 4:

#### For a Clean Installation:

Press the male end of one connector into the female end of another connector. This will group your connectors together, and leaves a clean looking installation.

Product #	Selling Unit
NLQ-LOC	Bag of 20
NLQ-LOC10	Bag of 10 (coming soon)

## Product Specifications:

**Connector Size:** 38.3 x 16.5 x 23.7 mm  
1.50" x 0.65" x 0.93"

**Wire Type:** Any Wire Type

**Wire Range:** Min #20 / Max # 12

#### Measurements (Inches):

A - 0.93      B - 1.50  
C - 0.493      D - 0.385

## Multi-Gauge Wire Combinations

QTY	AWG	and	QTY	AWG
2	#14		1 - 2	#12
2	#16		1 - 2	#12
4	#18		1 - 2	#12
2	#16		1 - 2	#14
4	#18		1 - 3	#14

US Patent 9,425,545

The **Q-Loc™ Wire Connector** was designed specifically to make your wire splices easier to install, cleaner looking and more secure.

- The Innovative Locking Bolt creates a quick connection while allowing for safe pulling when moving fixtures for final placement.
- Patented distribution of silicone gel makes sure you have a water-tight seal every time.
- Every connection needs two connectors; so we designed our connectors to snap together for a cleaner looking installation.
