

Deliver The Water

Mister Landscaper prides itself on giving the homeowner commercial grade products that can be used at home as well as in the fields of commercial industry. Misters, Spinners, and Swap Tops are no exception. The one major advantage to these Mister Landscaper products is their incredible watering efficiency. In combination with the Violet Flow Controller, these products use only 10 GPH (gallons of water per hour). Whereas, some commercial low-volume irrigation can use as much as 30 - 40 GPH. Those are great savings even by low-volume standards. Our Misters, Spinners, and Swap Tops are NOT foggers that atomize water. Our products have low angle-flat fan sprays to efficiently irrigate using a uniform spray pattern. These low angle sprays with heavy water droplets also help to prevent wind drift.

MLM-05 Small Full Circle Spinner

This solid green Spinner is an ideal solution for watering smaller landscape or garden areas where full coverage is desired. This Spinner has eight outlets to throw the water in a uniform coverage up to 38 square feet. 5 Spinners per card

5-7 ft. diameter small circle pattern

Lowe's Item # 71214

MLM-15 Large Full Circle Spinner

This green and gray Spinner utilizes only two outlets, allowing for increased pressure and longer spray distances. This Spinner covers up to 120 square feet and is ideal for large landscape and garden areas. 10 Spinners per bag

10-12 ft. diameter large circle pattern

Lowe's Item # 87864

MLM-01 End Strip Micro Spray

This violet End Strip Mister provides a narrow directional spray that makes it ideal for the ends of walk ways or narrow landscapes.

5 Misters per card

4-5 ft. radius end strip pattern (Width of Spray 1-2 ft.)

MLM-02 Center Strip Micro Spray

This yellow Center Strip Mister is a great solution for watering narrow walk ways and landscapes.

5 Misters per card

4-4.5 ft. radius center strip pattern (Width of Spray 1-2 ft.)
